Jordan Rivera

Data Analyst | SQL · Python · Tableau

Denver, CO • (555) 010-0142 • jordan.rivera@example.com • example.com/jordan

SUMMARY

Data analyst who turns operational data into dashboards and reports that teams use every week. Three years of SQL, Python, and Tableau across logistics and healthcare operations.

SKILLS

Analytics: SQL (PostgreSQL, Snowflake), Python (pandas), dbt, Excel (Power Query, pivot tables)
Reporting: Tableau, Power BI, Looker Studio, KPI design, executive summaries
Tools: Git, Jira, Airtable, Zapier, Google Workspace

EXPERIENCE

Juniper Freight Co. | Operations Analyst 2023 – Present
Denver, CO

- Built a **daily on-time delivery dashboard** in Tableau over about 40,000 shipments a month, replacing three manual spreadsheets.
- Wrote SQL and dbt models for carrier scorecards used in weekly dispatch reviews; late pickups fell 18% over two quarters.
- Automated invoice exception reports with **Python**, saving the billing team about 6 hours a week.
- Mapped the returns process with warehouse leads and wrote 12 SOPs that new-hire onboarding now uses.

Cobalt Ridge Health | Data Coordinator 2021 – 2023
Aurora, CO

- Kept scheduling data clean across four clinics; resolved 300+ duplicate patient records with a repeatable SQL check.
- Produced monthly utilization reports in Excel and **Power BI** for clinic managers.
- Trained 15 front-desk staff on the scheduling system's reporting views.

PROJECTS

Transit Ridership Explorer | Personal project 2024

- Cleaned five years of public ridership data with pandas and published an interactive Tableau dashboard of weekday demand.

EDUCATION

Lakeside State University | B.S. Business Analytics 2021
Data Analysis with SQL | Online certificate 2022
